

WID Who's Who

Like the *credits* at the end of a movie, WID has a cast of characters each of whom participates in the action. The above picture shows WID's *powered platform* which provides access to the face of the dam during major dam maintenance work. WID's current project substitutes carbon steel piping on the dam cylinders with stainless steel. This will complete extensive earlier stainless steel substitution for original carbon steel pipes and connections to protect the dam from rust corrosion.

Pictured are WID's operating staff:

Ken Kopka, WID Staff Director;

Davis Grant, WID Technician;

Sam Ellis, WID's long-time Dam Superintendent.

Invisible, but serving tangible functions are others:

WACO, Inc., Richmond based hydraulic contractor employees;

Bill Wagner and **Pat Foley**, Engineers, Whitman Requardt & Associates;

Dr. Ken Young, **Jack White** and **Christine Estes**, Engineers, GKY & Associates, Inc.;

Stu Finley, WID Operations Director;

Dave Alne, **Tony Bracken** and **Sammie Guy**, WID Trustees;

Fred Chanania, **Gen. Charles Cooper**, **Gary Jewell**, **Jack Keith**, **Ernie Rauth**,
Peter Silvia and **Dick Werling**, WID Associates;

Pat Divito, Architectural Consultant;

George Waters and **Peter Browne**, Lake Barcroft Association Liason;

Wendy Cline, Lake Barcroft Woman's Club Liason.

VDOT Bridge construction news: Project will be advertised August 23rd. Bids will be opened September 25th. 150 calendar days for construction. Completion likely about April, 2002.
